

Sales Demo Use Case 01 — Execution Intelligence

Scenario: Morning Alignment → Market Execution → Evening Review

User Persona: Ahmed, Order Booker

Territory: Gulshan Zone A

Role of DIGI: Intelligent Sales Supervisor

Demo Duration: Ideally 3–4 minutes

Demo objective

- Show that DIGI doesn't wait for the Order Booker to ask questions.
- DIGI knows Ahmed's territory, target, historical performance, active promotions, priority SKUs, outlet universe, and execution gaps.
- DIGI starts the day, guides execution, answers questions, receives market feedback, and closes the day with a performance review.

What This Demo Proves

- The demo should silently demonstrate one powerful flow:
- PLAN → GUIDE → SUPPORT → LISTEN → ANALYZE → INTERVENE → REVIEW → LEARN
- DIGI is simultaneously acting as an Intelligent Supervisor, Sales Coach, Knowledge Partner, Market Intelligence Collector, and Performance Manager.
- The strongest part is that Ahmed never opens a dashboard, never searches a report, never calls his manager, and never sends a market feedback Excel sheet.
- He simply talks to DIGI.

Scene 1 — Morning Alignment

DIGI:

Assalam-o-Alaikum Ahmed. Good morning. Ready for today's market?

AHMED:

Walikum Assalam DIGI. Yes, ready.

DIGI:

Great. Before you start, let's align on today's priorities.

- Your sales target is Rs. 485,000.
- Yesterday, you achieved 91% of target.
- Today, I want you to focus on three things:
- Premium Pack availability.
Ramadan Promotion execution.
15 priority outlets with declining sales.
- Would you like me to explain the priority outlets first?

AHMED:

Yes. Why are these outlets priority?

DIGI:

- Their combined sales are down 18% versus the last four-week average.
- The biggest decline is coming from Premium Pack and Family Pack.
- Seven of these outlets also reported availability issues last week.
- My recommendation is to visit these outlets before 1 PM.
- Shall I prioritize your outlet sequence?

AHMED:

Yes.

DIGI:

Done. I have prioritized the 15 outlets based on sales decline, opportunity, and route location.

- Your first priority is Al-Madina Store.
- One more thing, Ahmed.
- You achieved only 62% promotion execution yesterday.
- Today, our minimum expectation is 90%.
- Clear?

AHMED:

Clear.

DIGI: Excellent. Have a productive day. I'll check with you during market execution.

Scene 2 — Order Booker Asks DIGI

Ahmed is now in the market.

AHMED:

DIGI, what is the Ramadan promotion on Family Pack?

DIGI:

- The active Ramadan promotion is:
- Buy 10 Family Packs and receive 1 pack free.
- The promotion is valid until 25 March.
- Ahmed, this outlet purchased 8 packs on its last order.
- I recommend discussing the 10+1 offer with the retailer.

AHMED:

Okay. What was this outlet's last month sale?

DIGI:

- Al-Madina Store achieved Rs. 186,000 last month.
- Current month sales are Rs. 121,000.
- Based on the remaining selling days, the outlet is likely to close 11% below last month.
- The biggest gap is in Family Pack.
- Would you like a recommended order?

AHMED:

Yes.

DIGI:

Based on sales history and current purchase frequency, I recommend:

- 12 Family Packs
- 8 Premium Packs
- 24 Regular Packs
- This will also qualify the retailer for the Family Pack promotion.

Scene 3 — Market Feedback

AHMED:

DIGI, there is a problem.

DIGI:

Tell me, Ahmed.

AHMED:

Retailer is saying our competitor is giving more discount.

DIGI:

Understood.

Which competitor?

AHMED:

Brand X.

DIGI:

What discount are they offering?

AHMED:

Retailer says 5% extra and one free carton on 20 cartons.

DIGI:

Noted. Is this offer available to all retailers or only selected outlets?

AHMED:

I think selected outlets.

DIGI:

- Thank you. I have recorded this as a competitor promotion activity in Gulshan Zone A.
- I found similar feedback from three other outlets today.
- I am escalating this trend to the Area Sales Manager.
- Ahmed, don't commit any additional discount.
- Continue with the approved Ramadan promotion.
- Please update me if you find the same offer at another outlet.

Scene 4 — DIGI Proactively Intervenes

After some time, DIGI contacts Ahmed.

DIGI:

Ahmed, quick update.

- You have completed 18 of 32 planned outlets.
- Sales achievement is currently 54% of today's target.
- You're on track.
- However, Premium Pack productivity is below expectation.
- Only 5 outlets have ordered Premium Pack today.
- You still have 6 high-potential Premium Pack outlets remaining.
- I recommend focusing on these outlets during the next two hours.

AHMED:

Okay. Which outlets?

DIGI:

Your top three opportunities are:

- City Mart
- New Karachi Store
- Rehman Supermarket
- Together, these outlets purchased 42 Premium Packs last month.
- None have ordered the SKU this week.

AHMED:

Okay, I will focus on them.

DIGI:

Good. I'll review the progress with you in the evening.

Scene 5 — Evening Performance Review

At the end of the day.

DIGI:

Welcome back, Ahmed. Let's review your day.

- Today's target was Rs. 485,000.
- You achieved Rs. 512,000.
- That's 106% achievement.
- Well done.

AHMED:

Thank you.

DIGI:

- Your promotion execution improved from 62% yesterday to 91% today.
- Premium Pack productivity also improved after our afternoon discussion.
- You secured orders from 5 of the 6 priority outlets.
- One area needs attention.
- You completed 29 of 32 planned outlets.
- Why were three outlets not visited?

AHMED:

There was a road blockage and I spent more time at City Mart.

DIGI:

Understood. I have recorded the road blockage as a route constraint.

- City Mart generated Rs. 68,000, which was significantly above its normal order value, so the additional time was commercially productive.
- I recommend moving the three missed outlets to tomorrow's first priority. Agreed?

AHMED:

Agreed.

DIGI:

Done. One final question.

Apart from the Brand X promotion, did you observe any other significant market activity today?

AHMED:

No. Nothing else.

DIGI:

Noted. Today's summary has been updated. Your priorities for tomorrow are ready. Good work today, Ahmed. See you tomorrow morning.
